M. Sc (Physics), *M. S. University, Tirunelveli, India (1997)*
B. Sc (Physics), *M. S. University, Tirunelveli, India (1995)*

Professional Background:

Scientist SF, SPL, VSSC	: July 2018 – present
Scientist SE, SPL, VSSC	: July 2012 – June 2018
Scientist SD, SPL, VSSC	: February 2006 – June 2012
<i>Scientist B, ARIES, Nainital</i>	: December 2004 – February 2006
<i>Research Associate, SPL, VSSC</i>	: September 2004 – December 2004
<i>Senior Research Fellow, SPL, VSSC</i>	: August 1999 – July 2004

Area of specialization & Research interests:

Troposphere-Stratosphere coupling Processes, Water vapour, Ozone and Aerosols in the in Upper Troposphere and Lower Stratosphere (UTLS), Turbulence, Tropical cirrus, Stratosphere-Troposphere Exchange (STE) Process, Remote Sensing of the Atmosphere using Lidar, Radar and Satellite

Scientific publications

Peer reviewed Publications in Journals/Proceedings	: 48
Other Proceedings	: 17
Chapters in Books	: 01
Scientific Reports	: 01
Symposium Presentations	: 59

Academic Responsibilities

- PhD thesis Supervision: 2 completed, 1 Ongoing
- Recognized Research Supervisor for Ph.D at University of Kerala and CUSAT
- Member, Doctoral Committee of Research Fellows of SRM university, Chennai
- Member, CUSAT Research/Doctoral Committees for Research fellows
- Reviewer of Journals: JASTP, IJRSP, JGR, AR, Climate dynamics

प्रमुख ज़िम्मेदारियाँ/Major Responsibilities:

- Development of prototype of an instrument for "Solar occultation Experiment" under TDP (R&D) for profiling aerosols, thin clouds, trace gas in the troposphere and lower stratosphere [**Principal Investigator**].
- Development of Payload "Solar occultation Photometry for vertical profiling of Aerosols and thin clouds in Venusian atmosphere" (SPAV)" for the upcoming ISRO's Venus mission [**Principal Investigator**].
- **International Alliance for Research on "Indian Ocean Dipole (IOD)" (Co-Investigator).** The proposal aims to examine the climatic and environmental perturbations during the strongest IOD event in 2019 through international joint efforts .Responsibility is to focus on "*Improving the understanding of UTLS processes in response to IOD events*". Conducted weekly balloons flights from TERLS during October-December 2019 (Total: 10 flights] for studying the impact of IOD event in the Upper Troposphere and Lower Stratosphere (UTLS). The data obtained from radiosonde and ozonesonde are being analysed to study the impact of IOD.
- GPS Aided Radiosonde Network Experiments for Troposphere stratosphere Studies (**GARNETS**) program under TDP (R&D) [**Principal Investigator**]: *For the first time, designed an approach and conducted in situ measurements (balloon-borne experiments) of water vapour and ozone in the upper troposphere and lower troposphere (UTLS) over the hotspots (deep convective outflow regions) & non-hotspots regions of Indian region. Light-weight sensors such as Cryogenic Frost-point Hygrometers (125 Nos), Ozonesondes (160 Nos) and GPS-radiosondes (750 nos) are flown balloons from Thumba, Hyderabad, Kolkata during 2014-2020.*
- Validated VSSC developed Dr. Pisharoty sondes from a net of stations over India and over Indian Ocean.
- Designed, coordinated and executed the **Tropical Tropopause Dynamics (TTD) campaigns** under **ISRO's CAWSES-India Phase-II program**. Simultaneous balloon flights from Thumba and Gadanki at 3 hour interval for 3 consecutive days in each month during December 2010- March 2014 and obtained 1300 radiosonde profiles from 40 campaigns [**Principal Investigator**].

प्रमुख वैज्ञानिक उपलब्धियाँ/Major Scientific Accomplishments:

- New perspective of Tropical Tropopause Layer (TTL) and demonstrated the sub-layers in the TTL
- Global structure of TTL and structure of static stability across their sub-layers over the tropics
- Distribution of water vapour, Ozone, cirrus and deep clouds across the sub-layers of TTL
- Long-term and short-term variabilities of Tropical tropopause and their association with QBO and ENSO
- Turbulence characteristics in the troposphere and in lower stratosphere and their generations
- Comprehensive study on the Water vapour and Ozone viability in the UTLS region over Monsoon region.
- Comprehensive study on tropical cirrus and aerosol distribution in the UTLS region over India.

All these studies were carried out over the Indian region by integrating lidar and balloon-borne observations with satellite observations of KALPANA-1, CALIPSO and Aura-Microwave Limb Sounder.
